

Legless with Cuthbert

A large contingent of HB Founders members supported Erica in the launch of her book. The function was held at Summerset in the Oaks where many of the invited guests also shared Erica's life during the writing of this informative and at times compelling but also a very positive take on what could have been a far less encompassing life. 'Erica's story is an enriching read of an era when being an amputee wasn't furnished with the aid and services available today'.

A delightful Bonnie gave a very eloquent tribute to her grandmother. This was followed by a pen portrait of Erica's journey writing her book, succinctly and beautifully told by her daughter Susan.

Erica then read a short passage from her book before acknowledging those that helped to make this publication including the NZ Founder Society Research Award.

A full report on the launch compiled by Susan will soon be published in the local HB Today.
